# Econ 2250: Stats for Econ

## Fall 2022

# What we will do today?

- Something that we discussed last time?
- Deep dive python basics [intro](#)
  - lists, data types, functions, conditionals
- Use these tools to derive standard deviation
- Discuss counts and ranking
  - Median, quantile
- Apply mean, median, counts, q5, q95 to continuous and discrete variables

Review

What are the three things that economists are looking for in statistical analysis?

Discuss question from last time

- How to record
  - Video recording (check out loom) [https://www.loom.com/education](https://www.loom.com/education)
- Python basics
  - Let's work through [examples](examples)
  - Try the homework, reach out with any questions
- Discrete examples
  - We will discuss this more on Wednesday

Does everyone feel that they have at very least the tools needed for the homework?
